

STATE OF NORTH CAROLINA
DEPARTMENT OF ENVIRONMENT AND NATURAL RESOURCES
DIVISION OF WATER QUALITY

PERMIT
TO DISCHARGE WASTEWATER UNDER THE
NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM

In compliance with the provisions of North Carolina General Statute 143-215.1, other lawful standards and regulations promulgated and adopted by the North Carolina Environmental Management Commission, and the Federal Water Pollution Control Act, as amended,

**The Neuse River Compliance Association
and Its Co-Permittee Members**

are hereby authorized to discharge Total Nitrogen from the Co-Permittee Member treatment facilities listed herein to receiving waters in the Neuse River Basin in accordance with effluent limitations, monitoring requirements, and other conditions set forth in this Permit.

This Permit shall become effective **January 1, 2004**

This Permit and the authorization to discharge shall expire at midnight on **December 31, 2007**

Signed this day **January 20, 2004**

Original signed by David A. Goodrich for

Alan W. Klimek, P.E., Director
Division of Water Quality
By Authority of the Environmental Management
Commission

APPENDIX A - CO-PERMITTEES, TRANSPORT FACTORS, AND TN ALLOCATIONS.....	1
APPENDIX B - POINT SOURCE FACILITIES ASSIGNED TOTAL NITROGEN ALLOCATIONS	1

PART I SPECIAL CONDITIONS

A.(1.) DEFINITIONS

- (a.) Allocation (or "TN Allocation"): The mass quantity (as of TN) that a discharger or group of dischargers (such as the Association) is allowed to release into surface waters of the Neuse River Basin. TN Allocations may be expressed as *Estuary TN Allocation* or as the equivalent *Discharge TN Allocation*.
- (b.) Association: The Neuse River Compliance Association, a not-for-profit corporation comprised of NPDES-permitted dischargers in the Neuse River Basin; established voluntarily under T15A NCAC 2B .0234 to meet the aggregate Estuary TN Allocation of its members.
- (c.) Co-Permittee Members: Those NPDES dischargers that for a given calendar year are members of the Association and are listed in Appendix A of this Permit.
- (d.) Discharge TN Allocation: TN Allocation specified at the point of discharge (or "end-of-pipe"). A Co-Permittee Member's Discharge TN Allocation is equivalent to its Estuary TN Allocation divided by the applicable Transport Factor.
- (e.) Discharge TN Load: Actual TN Load measured at a Co-Permittee Member's point of discharge (or "end-of-pipe").
- (f.) Estuary: The Neuse River estuary, which extends from approximately Streets Ferry to the Pamlico Sound.
- (g.) Estuary TN Allocation: TN Allocation specified at the estuary.
- (h.) Estuary TN Load: TN Load determined at the estuary. A Co-Permittee Member's Estuary TN Load is equivalent to its Discharge TN Load multiplied by the applicable Transport Factor.
- (i.) Load (or "TN Load"): The actual mass quantity (as of TN) that a discharger or group of dischargers releases into surface waters of the Neuse River Basin. TN Loads may be expressed as *Discharge TN Load* or as the equivalent *Estuary TN Load*.
- (j.) Regionalization: The consolidation of wastewater collection and/or treatment systems that results in the elimination of one or more NPDES-permitted discharges.
- (k.) Total Maximum Daily Load (of TMDL): The allowable load of a pollutant that can be discharged to a water body without causing loss of that water's designated uses. Also, the *Phase II of the Total Maximum Daily Load for Total Nitrogen to the Neuse River Estuary, North Carolina*, approved by the U.S. Environmental Protection Agency on March 19, 2002, and subsequent revisions approved by the EPA.
- (l.) Total Nitrogen (TN): The sum of the organic, nitrate, nitrite, and ammonia species of nitrogen in a water or wastewater.
- (m.) Transport Factor: Fraction of the TN in a discharge that is predicted to reach the estuary, as determined by the Division.

A.(2.) CO-PERMITTEES AND TN ALLOCATIONS

- (a.) Co-Permittees to this Permit shall be the Neuse River Compliance Association (the "Association") and each of its Co-Permittee Members. The Co-Permittee Members, the Transport Factors assigned to each, the Members' individual TN allocations, and the Association Estuary TN Allocation shall be as listed in Appendix A, which is hereby incorporated into this Permit in its entirety.
- (b.) Upon timely and proper notification by the Association as described elsewhere in this Permit, the Division shall revise Appendix A to incorporate changes in Association membership, allowable changes in TN Allocations, or reapportionment by the Association.
 - (i.) Changes in membership.
 - (A) Enrollment. In the event that a discharger joins the Association, the Division shall add the discharger and its TN Allocation to Appendix A as a Co-Permittee Member and adjust the Association's TN Estuary Allocation accordingly.
 - (B) Termination. In the event that a Co-Permittee Member's membership is terminated, the Division shall delete the departing Member and its TN Allocation from Appendix A and adjust the Association's TN Estuary Allocation accordingly.
 - (ii.) For the purposes of this Permit, allowable changes in TN Allocations include those resulting from purchase of allocation from the Wetlands Restoration Fund; purchase, sale, trade, or lease of allocation among the Association, its members, and non-member dischargers; regionalization; and other transactions approved by the Division.
 - (iii.) The Association may reapportion its TN Allocation among its Co-Permittee Members; however, the Division shall only incorporate the corresponding changes into Appendix A when specifically requested in writing by the Association.
- (c.) Changes in Association membership and changes in individual or Association TN Allocations shall become effective only at the beginning of the following calendar year (January 1).

A.(3.) EFFLUENT LIMITATIONS

- (a.) Beginning on the effective date of this Permit and lasting no later than the expiration date, the Co-Permittees are authorized to discharge Total Nitrogen (TN) from the treatment facilities listed in Appendix A subject to the following effluent limitations.
 - (i.) Association TN Limitation. In any calendar year, the Association's Estuary TN Load shall not exceed its Estuary TN Allocation as specified in Appendix A:

Association TN Limitation: For any calendar year,

$$\text{Association Estuary TN Load} \leq \text{Association Estuary TN Allocation}$$

where

$$\text{Association Estuary TN Load (or Allocation)} = \text{Sum of Estuary TN Loads (or Allocations) for All Co-Permittee Members}$$

- (ii.) Co-Permittee Member TN Allocations. In any calendar year, a Co-Permittee Member shall be in compliance with its Estuary TN Allocation in Appendix A if:
 - (A) the Association Estuary TN Load complies with the Association Estuary TN Allocation in Appendix A, or

- (B) in the event that the Association Estuary TN Load exceeds its Estuary TN Allocation, the Co-Permittee Member's Estuary TN Load does not exceed that Member's Estuary TN Allocation in Appendix A.
- (b.) Other Individual Limitations. In the event that a Co-Permittee Member's membership in the Association is terminated, the departing Member shall no longer be eligible for coverage under this Permit and shall become subject to the TN limitation set forth in its individual NPDES permit.
- (i.) Termination of membership shall become effective only at the beginning of a calendar year (January 1). Re-imposition of a discharger's individual TN limitation shall become effective only at the beginning of a calendar year (January 1).
- (ii.) The Association shall notify the Division if it determines that any Member will depart at the end of a calendar year and shall provide an accounting of all allowable changes in the Member's TN Allocation since the most recent issuance of the departing Member's individual NPDES permit.
- (iii.) Upon receipt of the notification and accounting described above, the Division shall modify the TN limitation in the departing Member's individual NPDES permit, effective January 1 of the succeeding year, to reflect all allowable changes in the Member's TN Allocation and shall also modify Appendix A of this permit accordingly.

A.(4.) MONITORING REQUIREMENTS

- (a.) Each Co-Permittee Member shall continue to monitor its discharge(s) and report the results to the Division as specified in its individual NPDES permit.
- (b.) The Association shall assemble the results of its Co-Permittee Members and report the combined results to the Division as specified in Condition A.(5.), below.

A.(5.) REPORTING REQUIREMENTS

- (a.) The Association shall serve as the primary point of contact between the Division and the Co-Permittee Members on matters related to this Permit, unless otherwise noted. The Association's responsibilities in this regard include:
- (i.) preparation and submittal of any reports required by this permit or of related information requested by the Division;
- (ii.) submittal of any request for modification or renewal of this permit; and
- (iii.) distribution to the Co-Permittee Members of correspondence from the Division, including but not limited to that pertaining to permit issuance, modification, and renewal; compliance; and reporting.
- (b.) Mid-Year Report. No later than August 31, 2003 and each August 31st thereafter, the Association shall submit a mid-year report to the Division. The report shall include, at a minimum, the following information:
- (i.) for the period beginning July 1 of the preceding year and ending June 30 of the current year, a Discharge Monitoring Report, for informational purposes only, of each Co-Permittee Member's Discharge and Estuary TN Loads and the Association's Estuary TN Load.
- (ii.) notification of any changes in Association membership or TN Allocations to become effective in the following calendar year.
- (c.) Year-End Report. No later than February 28, 2004 and each February 28th thereafter, the Association shall submit a year-end report to the Division. The report shall include, at a minimum, the following information for the previous calendar year:

- (i.) for the period from January 1 through December 31 of the preceding year, a Discharge Monitoring Report of each Co-Permittee Member's Discharge and Estuary TN Loads and the Association's Estuary TN Load;
 - (ii.) a summary of changes in Association membership, including regionalization of discharges;
 - (iii.) a detailed summary of all purchases, sales, trades, leases, and other transactions affecting the TN Allocations of the Association or its Co-Permittee Members;
 - (iv.) a description of the Association's TN control strategy for the preceding year and changes for the coming year;
 - (v.) a detailed summary of measures taken to control TN discharges;
 - (vi.) an assessment of progress made; and
 - (vii.) a description of efforts planned for the upcoming calendar year(s).
- (d.) Five-Year Report. No later than July 1, 2007, in conjunction with application for renewal of this Permit, the Association shall provide a detailed summary of all membership changes and allowable changes in TN Allocations of the Association or its Co-Permittee Members occurring during the term of this Permit.

A.(6.) COMPLIANCE

- (a.) In the event that the Association exceeds its Estuary TN Allocation in a given calendar year, the Association shall make offset payments for the excess TN for that year at a rate of \$11 per pound (15A NCAC 2B .0240) or such other rate as may be adopted by the Commission. Payment shall be made no later than May 1 of the year following the exceedance and shall be submitted to:

NCDWQ / Wetlands Restoration Program
Attn: Neuse River Basin Offset Payments
1619 Mail Service Center
Raleigh, NC 27699-1619

and three copies shall be submitted to:

NCDWQ / NPDES Unit
Attn: Neuse River Basin Offset Payments
1617 Mail Service Center
Raleigh, NC 27699-1617

- (b.) For any calendar year in which the Association exceeds its Estuary TN Allocation, the Association shall be in violation of this Permit, and the Division may take appropriate enforcement action against the Association for such exceedance.
- (c.) For any calendar year in which the Association exceeds its Estuary TN Allocation, any Co-Permittee Member that exceeds its Estuary TN Allocation shall also be in violation of this Permit; and the Division may take appropriate enforcement action against the Member.
- (d.) Submittal of offset payments shall not limit the Division's authority to enforce the terms and conditions of this Permit, nor shall it relieve the Association or its Co-Permittee Members of their responsibility to comply with any other applicable federal, state, or local law, rule, standard, ordinance, order, judgment, or decree. In determining the amount of any penalty to be assessed against the Association or its Co-Permittee Members, the Division shall credit the Association or its Members for any offset payments submitted by each; provided that the Association includes with the offset payment submittal an accounting of each Member's contribution.
- (e.) No Co-permittee Member shall be liable for any other Co-permittee Member's non-compliance with this permit.

APPENDIX B

**POINT SOURCE FACILITIES ASSIGNED TOTAL NITROGEN ALLOCATIONS
NEUSE RIVER BASIN**

The following is a list of all treatment facilities that, as holders of individual NPDES permits in 1995, are assigned a Total Nitrogen (TN) allocation pursuant to state rule T15A NCAC 2B .0234, *Neuse River Basin Nutrient Sensitive Waters Management Strategy - Wastewater Discharge Requirements*, adopted December 1997 and revised October 2002.

The rule establishes an aggregate Estuary TN Allocation of **1.64 million pounds TN per year** for these facilities and prescribes how the allocation is to be divided among the individual facilities. The allocations, individual and aggregate, become effective with calendar year 2003.

The *Total Maximum Daily Load for Total Nitrogen to the Neuse River Estuary, North Carolina*, approved by the USEPA Region 4 in July 1999, also concludes that this aggregate allocation is the maximum allowable contribution from point source dischargers to the Neuse River estuary.
